

PUBLIC NOTICE

Posted August 16, 2021

Shreveport Airport Authority (the Authority) intends to file a new Passenger Facility Charge (PFC) application #5 with the Federal Aviation Administration (the FAA) to impose and use PFCs on one (1) new project at Shreveport Regional Airport (the Airport) at a \$4.50 PFC collection rate.

The proposed effective date for the new application is January 1, 2022, and the estimated charge expiration date is February 1, 2023. The charge effective date reflects the Authority's estimate of when the authorized amount of PFC #4 will be fully collected. It is earlier than the "legal" charge expiration date, because SHV's actual and projected passenger traffic have exceeded the projections used to establish the legal expiration date. The application requests \$1,400,800 of PFC collection and use authority.

REQUEST FOR COMMENTS: The Authority welcomes the public's comments and support for the projects discussed below and will review all comments submitted in writing by no later than September 15, 2021. Please address any questions or comments to:

Stephanie Tucker
Interim Director of Airports

PROJECT INFORMATION

In accordance with 14 CFR §158.30, the Authority will be requesting authorization to impose and use PFC funds for the following project:

Project 5.1 – Terminal Canopy and Awning Rehabilitation

Project Description: This project will rehabilitate the terminal curbside canopy and awning which serve as the main entrance and exit from the Shreveport Regional Airport (SHV). The canopy and awning consist of approximately 40 ft. by 567 ft. of rigid metal deck/roofing over steel pipe with section super structure of steel beam cantilever and steel pipe sub-frame.

Project elements include the following:

- Removal/repair of rusted/deteriorated metal decking to fix multiple leaks;
- Rehabilitation of approximately 42 leaking skylights to fix multiple leaks;
- Scraping/sanding/priming and painting all surfaces with specified weather resistant coating; and Replacement of all lighting (approximately 92 fixtures, no cabling will be replaced).

The table below provides a breakdown of the estimated costs of the project:

**Terminal Canopy and Awning Rehabilitation
Summary of Costs**

Cost Item	Amount
Canopy Structure	
Prep/Blasting to Receive Coating	\$600,000
Industrial Coating (Material & Labor)	575,000
Canopy Structure Total	\$1,175,000
Roof	
Prep/Blasting to Receive Coating (Incl. Removal/Repair of Rusted Decking, Skylight Repair & Light Replacement)	90,400
Industrial Coating (Material & Labor)	90,400
Roof Total	\$180,800
Temporary Construction Barricades	15,000
Phasing	20,000
Trash Removal	10,000
Project Total	\$1,400,800

There are currently no restraints on competition at SHV. This project is intended to address potential public safety issues by correcting deteriorated structures that are prone to leaking.

Project Justification: The terminal awning is one of the first things passengers see when they arrive in Shreveport and last thing they see before they leave. The canopy and awning are subject to leaking from rusted and/or deteriorated metal decking and from existing skylights. The leaking poses a public safety hazard during even minor rain events and also contributes to accelerated deterioration of the terminal building. The existing canopy and awning were installed approximately 23 years ago and this will be the first refurbishment. Routine maintenance is no longer sufficient to correct or prevent the leaking problems that pose a public safety hazard and risk to the terminal building.

Additional information about the project may be obtained by contacting Ms. Stephanie Tucker using the contact information above.

There are currently no restraints on competition at SHV. This project is intended to address potential public safety issues by correcting deteriorated structures that are prone to leaking.

PFC Collection Level: \$4.50

Project Funding:	<u>Amount</u>
Pay-As-You-Go PFCs	<u>\$ 1,400,800</u>
Total Project Funding	<u>\$ 1,400,800</u>
